

# TAX YEAR 2005

## NEBRASKA REJECT CODE LISTING

### OVERVIEW

The Nebraska Department of Revenue will issue the following Reject Codes in the ACKR Nebraska Acknowledgment records. The primary purpose of these codes is to ensure that the Generic record is properly formatted. The edits used are intended to prevent data exceptions, and field and record construction errors such as invalid signs, missing required lines, incomplete forms and schedules, etc. With the exception to Nebraska Schedules II and III, and certain worksheets used to compute base form values, these codes are not concerned with calculation errors.

### CHANGE MANAGEMENT

Modifications are in highlighted bold red text, indicated with asterisk in the Reject Code column and use the identifiers CHG or NEW. The placement of various form lines in the Generic Record has changed necessitating reassignment of IRS Sequence Numbers. Those modifications that reflect IRS Sequence Number changes only have their Sequence Numbers highlighted, but no other change indications are made.

Below is a summary of changes for Tax Year 2005:

- Old codes have been removed that were previously used in conjunction with reporting data on Form 4136N. This form no longer exists. Reject Codes that were removed include, 0163, 0164, 0165, 0166, 0167, 0168, 0169, 0187, 0188, 0189, and 0190.
- New codes have been issued to enforce the data integrity of new fields added to the Refundable Child Care Credit Worksheet. New signed numeric fields are located in Sequence Numbers 0835 through 0880. Additionally, alphanumeric fields 0305 through 0325 contain provider name and address information. A new Reject Code (0203) has also been created to require the Worksheet to be present and complete when the credit is claimed. New Reject Codes that have been added to enforce signed numeric data integrity include, 0192, 0193, 0194, 0195, 0196, 0197, 0198, 0199, 0200, 0201, and 0202.
- Two new lines have been added to the Nebraska return. One replaces the old Line 30 (Form 4136N credit) with a new Form 3800N Refundable credit. Line 23, Form 3800N Nonrefundable credit still exists. The new refundable credit on Line 30 is not accepted in e-file and therefore needs only one new Reject Code (0191) to enforce this. The other new line is on Nebraska Schedule I. It is Line 52, Bonus Depreciation Subtraction. This line is accepted in e-file and one new Reject Code (**0322**) has been added to enforce data integrity. Additionally, the new Line 52 cannot be filed with a Form 1040NS and would be rejected if the base form is a 1040NS.
- A new code (0021) will be added for decedent returns. If the Date of Death is present; the Filing Status must equal 2 (Married Filing Joint), only one date (either Primary or Spouse) can be present, and this date must equal the current tax year or the current tax year plus 1. Please note that a change has been made to Reject Code 0021. Previously this indicated that the return must be a refund return, however, that has since been determined to be not true. Therefore language in the description of the code has changed to reflect that.
- To reduce the number of unnecessary rejects, edits for Nebraska Schedule II will be modified. For Reject Code 0407 (A Nebraska Schedule II was entered, but the postal

abbreviation indicating the other state, was invalid or missing) the return will not be rejected unless all lines on the Schedule II are present. For Reject Code 0408 (A Nebraska Schedule II was entered, but has lines missing) the return will not be rejected unless a value exists in 1040N Line 20 and the Credit For Prior Year Minimum Tax Indicator is '0'.

#### Corrections since the October draft:

- Reject Codes 0139 through 0143 and 0405 contained invalid sequence number references. These have been changed.
- Reject Code 0199 has been eliminated because it was a duplication of 0198.
- Reject Code 0321 was assigned to two separate errors. The code 0321 assigned to Line 52, Bonus Depreciation Subtraction has been changed to Reject Code **0322**.
